## EMPLOYMENT INFORMATION FOR GRADUATES

The college's goal in the employment issue is to create an effective system to assist graduates in finding employment in accordance with their qualifications and adapting them to the labor market. This work is implemented in the following main areas: formation of a database of graduates, creation of a database of enterprises, institutions and organizations of potential consumers of graduates, expanding the skills of graduates, both within the framework of the specialties they receive and beyond, organization and implementation of psychological support for graduates and students in order to adapt to the market, organization of educational, industrial and pre-graduation practices of students in medical organizations that can become potential employers, monitoring the employment of college graduates, assessing employers' satisfaction with the quality of graduate training. The need of medical organizations for personnel is studied annually based on their applications, regardless of the form of ownership. A prospective and annual plan for the admission of applicants is drawn up.
